

Are you looking for an effective way to target training and measure results?

The AWES Workplace Essential Skills Assessment Tool can be used by individuals, in the workplace, and in the classroom to assess skills, develop targeted training, and measure progress.

Assess

Train

Gain

What are the features and benefits?

- It is easy to use, informative, cost-effective, and reliable.
- It measures workplace essential skills levels in reading, document use, and numeracy.
- Users instantly get a customized results report and learning plan.
- A post-assessment can measure training results.
- It can be used with all adult learners including English Language Learners and Indigenous groups.

How does the assessment tool work?

Locator test

The locator test is a six-question testlet designed to take the anxiety out of test taking for people with lower literacy skills. If the learner scores high, they go to the next level. If they score low, the assessment is finished.

Short and long version assessments

Each of these assessments contains an adaptive algorithm, meaning that if a question is answered correctly the next question will be harder, but if the question is answered incorrectly, a question of the same level will be given. AWES will help you choose the version that fits your needs.

	Short version		Long version	
	Questions	Time	Questions	Time
Reading	15	15 - 20 min.	30	28 - 36 min.
Document use	15	13 - 18 min.	30	26 - 34 min.
Numeracy	24	20 - 30 min.	30	20 - 30 min.
