

AWES Online Essential Skills Assessment

Effective and reliable assessment to track learner progress

Assess skills

Customize training

See results

The AWES assessment tool can be used by individuals, in the workplace, and in the classroom to assess skills, develop targeted training, and measure progress.

What are the benefits?

- Easy to use, reliable, and cost-effective.
- Can be used by anyone in education, employment, and continuous learning contexts.
- Can be used to measure skills improvement.
- Features a customized results report and learning plan.

How does it work?

Each skills assessment uses an adaptive algorithm, meaning the assessment adjusts to the learner's ability to answer questions.

When a learner reaches their proficiency ceiling on any given skill, the test ends and an assessment result is calculated.

AWES will help you choose skills assessments that fit your needs.

SKILLS ASSESSED	Questions*	Time†
 Reading	21	21
 Numeracy	30	35
 Digital	20	9
 Communication: Listening	15	18
 Problem solving	15	16

*Number of multiple choice questions pulled from database

†Approximate length in minutes

To preview the assessment, visit our [website](#) and try the practice questions.
